

HERCULESTM

PATIENT REPOSITIONER

Multicare powered by Hercules
allows a single caregiver
to safely reposition a patient
side to side and up in bed
with the simple push of a button

A NEW WAY TO REPOSITION EVIDENCED BY OUTCOMES

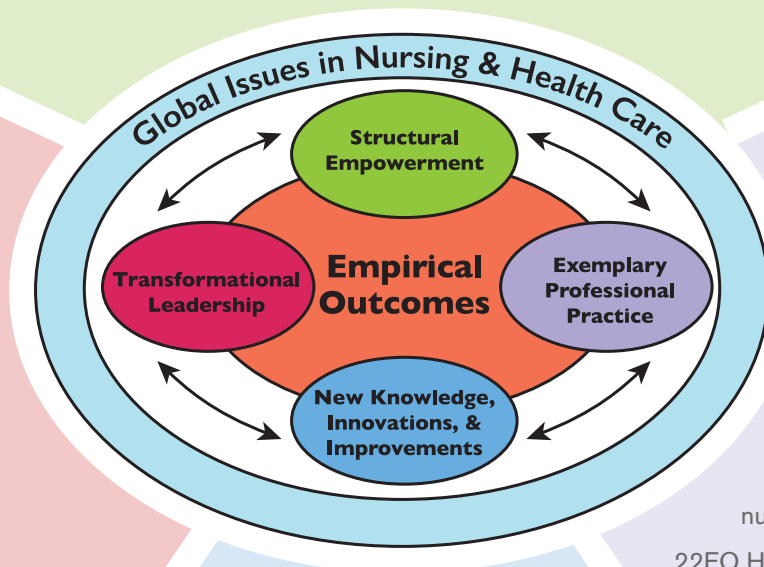

Helping achieve Magnet designation

STRUCTURAL EMPOWERMENT

1EO Lateral Tilt and Hercules drives inter-professional decision-making regarding equipment to drive efficiencies (1 nurse repositioning in seconds vs. several nurses & multiple minutes)

TRANSFORMATIONAL LEADERSHIP

9EO Multicare with Hercules demonstrates CNO advocacy for nursing workforce safety

EXEMPLARY PROFESSIONAL PRACTICE

3EO Nursing satisfaction (adequacy of resources and staffing) increases when workforce injuries decrease

18EO Multicare with Hercules directly addresses and improves the #1 workplace safety issue for nurses – repositioning

22EO HAPI risk decreases because caregivers reposition more frequently with Lateral Tilt and Hercules. Ergoframe improves envelopment and pressure redistribution

23EO Patient experience improves because Lateral Tilt and Hercules eliminates the pain and discomfort of traditional repositioning and because caregiver response time for repositioning improves

NEW KNOWLEDGE, INNOVATIONS & IMPROVEMENTS

5EO Nurse implementation of Lateral Tilt and Hercules innovative technology demonstrates the use of technology to enhance the patient experience (less pain and greater responsiveness with repositioning) and improve your nursing practice with more timely repositioning
