

ergozoneTM

Advanced pressure redistribution mattress

Wound Prevention. Superior Comfort.

ErgozoneTM advanced pressure redistribution mattresses are designed specifically for patient comfort and pressure ulcer prevention. Surface Modification Technology, dedicated envelopment zones and open cell memory foam work in unison to maximize envelopment, minimize pressure and increase patient satisfaction.

Ergozone™ – advanced pressure redistribution

optimum surface solutions

Highlights

- Enhanced pressure redistribution zones for high risk areas
- Optimal envelopment
- Top cover helps manage shear and friction
- Increased patient comfort and satisfaction

Pressure Ulcer Prevention

SURFACE MODIFICATION TECHNOLOGY (SMT)

creates alterations in the mattress (by pattern, size, depth, spacing and location) to maximize pressure redistribution and protect the most vulnerable areas of the body.

OPEN CELL TECHNOLOGY removes body heat at a greater rate than conventional foams providing a cooler, drier experience for the patient.

- Greater air flow for temperature and moisture management
- Increased support retention over the life of the mattress

Green Manufacturing

ENVIRONMENTALLY FRIENDLY processes use natural, renewable materials.

CONSISTANT QUALITY with enclosed production system.

A Portfolio of Prevention & Comfort
